Color coordinated bite block for easy identification of specific airway size. Individually wrapped

ONE-PIECE GUEDEL AIRWAYS

By using the latest technology we have produced the first major breakthrough in Guedel Airway design in thirty years. We have combined two materials with very different physical characteristics into one moulding, resulting in the elimination of the separate bite block found in all conventional Guedel Airway designs. This breakthrough offers enhanced patient safety while incorporating a soft tip to further reduce patient trauma.

ADULT CIRCUIT WITH GAS SAMPLING ELBOW – 3 LITER BAG, FILTER

| DESCRIPTION | ORDER NO. | REGULAR PRICE |
|--|-----------|---------------|
| <input type="checkbox"/> 48" with Gas Sampling Elbow, 3 liter bag and filter – 20/cs | H-3214 | \$124.00/cs |
| <input type="checkbox"/> 60" with Gas Sampling Elbow, 3 liter bag and filter – 20/cs | H-3216 | \$135.00/cs |

Features and Benefits:

- Single use to reduce the cost and inconvenience of sterilization and potential risk of cross infection.
- Connectors allow for a tight seal to all fittings to minimize any leakage and risk of disconnection.
- Excellent drapeability with low compliance and memory.

ADULT EXPANDABLE FLEX LIMB CIRCUITS – 36" TO 72"

| <input type="checkbox"/> Breathing Bag, 3 Liter, 30 per case | H-1022 | \$150.00/cs |

CASTrGARD™

Quick to put on, take off, and put back on. Our superior one-piece design makes it the most convenient wheel guard device available.

CASTrGARD eliminates the need to stop monitoring the patient in order to clear a wheel obstruction.

CASTrGARD devices used on all four wheels for optimum safety and performance. CASTrGARD can be safely used on a variety of operating room equipment including anesthesia machines, electrosurgical generators, drug carts, and minimally invasive surgery carts.

- PVC sampling lines for measurement of end-tidal CO₂

END-TIDAL CO₂ MONITORING OXYGEN CANNULA

| DESCRIPTION | ORDER NO. | REGULAR PRICE |
|---|-----------|---------------|
| <input type="checkbox"/> Adult Nasal Cannula with male luer connector for gas monitoring line and 7 ft. oxygen tubing – 25/cs | H-0315 | \$98.00/cs |
| <input type="checkbox"/> Adult Nasal Cannula with female luer connector for gas monitoring line and 7 ft. oxygen tubing – 25/cs | H-0316 | \$98.00/cs |
| <input type="checkbox"/> Same as H-0315 with 10 ft. gas monitoring line with male luer connector – 25/cs | H-0317 | \$104.00/cs |
| <input type="checkbox"/> Same as H-0316 with 10 ft. gas monitoring line with female luer connector – 25/cs | H-0318 | \$104.00/cs |

Nasal Cannula includes Universal Oxygen Tubing permitting oxygen tube to connect direct to oxygen flowmeter without nut-and-nipple adapter.

- Excellent sampling accuracy as there are two end tidal CO₂ sampling ports
- Superior waveforms as Dual has two end tidal CO₂ sampling ports
- Reliable sampling under the following conditions:
 - Clogged Sinus' in one nostril
 - Deviated septum
 - Polyps
- Oxygen delivered in both nostrils at lower rate, thus minimizing mucosal wall damage.
- Secure luer lock connection for both Male & Female connections
- Soft tip cannula provides superior patient comfort and nare positioning
- Non-kinking tube ensures consistent and accurate delivery
- Universal Oxygen connector is standard on all items

JEMSDAL® MASK - WITH CO₂ MONITORING PORT

| DESCRIPTION | ORDER NO. | REGULAR PRICE |
|--|-----------|---------------|
| <input type="checkbox"/> Jemsdal Mask, Pediatric – 50/bx | H-7219 | \$500.00/bx |
| <input type="checkbox"/> Jemsdal Mask, Adult – 50/bx | H-7220 | \$325.00/bx |

- For monitoring non-intubated spontaneously breathing patients
- Excellent correlation between patient ventilation and capnograph tracing
- Clear mask incorporates unique entraining port with luer-lok connector for easy attachment to capnograph sampling catheter
- Comes with oxygen tubing
- Specially shaped JEMSDAL® mask
- Comfortable nose bridge reduces patient irritation from extraneous oxygen flow

LITHOLYME CO₂ ABSORBENT

| <input type="checkbox"/> GE Compact Style Cartridge – 10/cs (GE ADU Carestation, Contains 50% more product than OEM) | H-8685 | \$280.00/cs |

Premium Performance, Maximum Safety

Litholyme™ is a new CO₂ absorbent that eliminates the common concerns with traditional soda lime based products in that it eliminates the potential for production of compound A, carbon monoxide, and excessive heat. Its patented formula does not contain any NaOH or KOH, and features a permanent color change that will not revert over time.

Suitable for low flow applications, Litholyme is minimally exothermic, and its patented formula does not interact with sevoflurane or other commonly used inhalation anesthetic agents, even under fully desiccated conditions.

Litholyme features a permanent and profound white-to-violet color change that will indicate exhaustion or desiccation, eliminating the possibility for inadvertent use of expended product. Additionally, the deep violet color of exhausted or desiccated product will not fade or revert over time.

Efficient Canister Life

Litholyme has efficient CO₂ absorption properties which allow it to last as much as 30% longer than other premium CO₂ absorbents, making it the most cost effective option for a premium absorbent.

MURPHY WITH CUFF ENDOTRACHEAL TUBES

Low Price!

- Soft-rounded distal tip
- Crystal Clear PVC, making insertion markings easy to read
- High volume/low pressure cuff, elongated to equalize and reduce pressure against Tracheal tissue, assuring excellent seal, which may help to prevent VAP
- Quality pilot balloon with self-sealing valve

Protect your patient's eyes against corneal abrasion, lacerations and scleral hemorrhage during general anesthesia with these eye covers. These rigid, clear plastic protective covers are supplied with a non-allergenic self-adhesive foam cushion for fast and accurate application.

A vital consideration in ENT, head and neck surgery, these items protect the eyes from blood, fluid, and other materials.

SAVING EYES BREAKAWAY FACE PROTECTION SHIELD

Saving Eyes is a simple device to protect adult eyes and surrounding areas under General Anesthesia in the Supine position. It is used with ET or LMA's. The device is a single use shield constructed of fire retardant medical grade transparent plastic and latex free foam padding. It is held in place on the face with a latex free strap. The device is easy-on, easy-off: Contoured cut-away T-opening for ETT or LMA allowing removal of the device without disconnecting the anesthesia airway circuit.

Introducing the all new Endomask Eclipse 100% Disposable Silicone Laryngeal Mask Airway. Finally an LMA that combines patient comfort and ease of use at an economical price.

Superior Silicone Cuffs that conform to the natural contours of the hypopharynx for a perfect fit, allowing rapid, blind insertion, excellent seal and single hand ventilation. Cuffs are thick and durable with a smooth matte finish.

No epiglottic bar (aperture bar) obstructions enable easy access for a fiberscope and suction catheters.

Top quality inflation lines with self-sealing pilot balloons. The cuff assembly and tube body is smoother and has less voids and impurities within its structure than other silicone laryngeal masks.

■ A revolutionary, single use supraglottic airway

i-gel® and natural airway management –The i-gel is a truly unique airway device that represents the culmination of years of extensive research and development. Everything about the i-gel has been designed to work in perfect unison with the anatomy; the i-gel design was inspired by the physiology of the perilaryngeal framework itself – airway management as nature might have intended.

i-gel mirrors the anatomy – The shape, softness and contours accurately mirror the perilaryngeal anatomy to create the perfect fit. This innovative concept means that no cuff inflation is required. The i-gel works in harmony with the patient's anatomy so that compression and displacement trauma are significantly reduced or eliminated.

The non-inflating cuff – i-gel gets its name from the soft gel-like material from which it is made. It is the innovative application of this material that has enabled the development of a unique non-inflating cuff. This key feature means insertion of i-gel is easy, rapid and consistently reliable.

The simple, safe and rapid solution – i-gel is incredibly easy to use. With a non inflating cuff, i-gel provides a safe and rapid airway management solution.

Clinicians can perform intubations in the MR environment safe in the knowledge that the Diamond MRI Range has been tested up to the 720 gauss line in magnet field strengths up to 3.0 Tesla and has shown little or no deflection, image distortion or heating during use.

Lithium battery

This advanced battery technology is designed to provide approximately 8 hours life under continuous use. A typical alkaline battery will provide less than 2 hours of use under similar conditions.

HEINE XP® DISPOSABLE LARYNGOSCOPES

- No danger of cross-infection
- Cost-effective compared with most reusable systems
- HEINE 3,5 V XENON handles for exceptionally-bright, white light
- Includes the best-selling Classic+ blade shape

VISIONPRO VIDEO LARYNGOSCOPE

The new Heine VisionPro Video Laryngoscope is for every intubation, even the strange ones. Heine VisionPro Video Laryngoscope has combined the best components from the camera to the image processing to the new allBright display. The new Heine VisionPro is extremely robust and reliable. The grip head and display frame are made of anodized aluminum, while the handle and camera arm are made of stainless steel. The cover glass of the allBright display is highly protective. The allBright display provides true color for lifelike imaging even in bright ambient light. With its extra large field of view in portrait format, the new Heine VisionPro shows a significantly larger section of the glottis and the relevant surrounding anatomy. To ensure maximum patient safety, the display and handle can be easily separated for numerous validated reprocessing procedures and are Joint Commission compliant. The handle can be wipe disinfected or even sterilized by low temperature gas plasma. The display can be hygienically reprocessed with low level disinfection. This is thanks to the smooth and easy-to-clean surface called Heine smooth surface. Product H-1260 includes the VisionPro Mac Handle, Display Unit, Charging Station with plug. Disposable blades sold separately, 10 per box Mac 3 (H-1261), Mac 4 (H-1262) and Hyperangulated Mac 3 (H-1263).

PROVU VIDEO LARYNGOSCOPE

ProVu Video Laryngoscope Blade and Handle are single-use, limiting handling of a contaminated device and reducing the risk of cross contamination. The ProVu Display can be easily disinfected using standard disinfectors, so the product is free from contamination and ready to use for the next patient. The ProVu Laryngoscope imaging system has a focal length, field of view and illumination field optimized for an improved view of the glottic anatomy. Combined with excellent color rendition, blackout and blindspot reduction technology, ProVu Video Laryngoscopes reduce the shadowing effect of an ET tube when inserted in the upper airway. Other features include: 70 degree tilt screen, Plug and Play, 100% all metal blade and Anti-fog design.

I-VIEW VIDEO LARYNGOSCOPE

I-View is a single use, fully disposable video laryngoscope providing the option of video laryngoscopy wherever you might need to intubate. By combining all the advantages of a fully integrated video laryngoscope in a single use, disposable product, I-View provides a cost effective solution. By incorporating a Macintosh blade, I-View can also be used for direct laryngoscopy. I-View is ready in seconds after removal from packaging. The ergonomic design ensures I-View is easy and instinctive to use, and the integral LCD screen provides a view in a variety of light conditions. Disposal should be in accordance with normal procedures for clinical waste, including landfill or incineration. Local protocols or regulations should be followed when disposing of I-View.

00-100 PLUS PERIPHERAL NERVE STIMULATOR

The 00-100-PLUS Peripheral Nerve Stimulator is a lightweight, battery powered, hand held and adjustable stimulator. It is specifically designed for a wide range of clinical uses with both ball electrodes and various extension lead sets. Functions include Twitch, Train-Of-Four, and both 50Hz and 100Hz Tetanus. All functions are selected from membrane panel switches, under easy user control. Output voltage is fully adjustable, and functions can be set to automatically repeat (Twitch and TOF). LED indicators show the status of the device, low battery condition, the selected function, and pulse delivery. The 00-100-PLUS comes complete with ball electrodes and a 9v battery in an easily accessible compartment.

GERTIE MARX NEEDLES

The Gertie Marx pencil point spinal anesthesia needle was specially designed to deliver a faster CSF flow to patients undergoing spinal anesthesia than other leading needles currently being utilized. Not only did the Gertie Marx spinal anesthesia needle deliver a CSF flow rate two times faster than a Whitacre needle, a study asserted that the Gertie Marx needle's failure rate was zero.

All items sold 10 per box and include an introducer

AINCA VISUAL STYLET

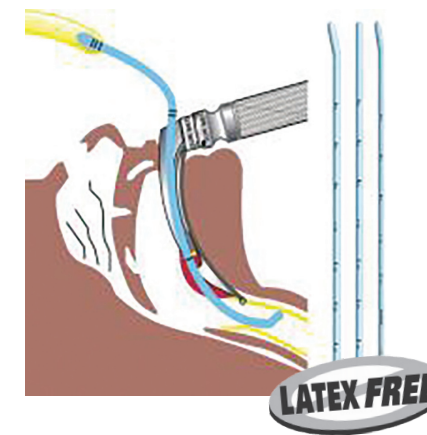

Difficult Visualization Made Easy and Affordable

The AincA VideoStylet is an inexpensive, lightweight, reusable "through the endotracheal tube" viewing system and introducing stylet. It allows the practitioner to obtain a direct view from the tip of the endotracheal tube as it progresses during intubation. This reusable stylet is a slender 5.8mm in diameter and is malleable along its entire length. It contains a powerful camera assembly with ultrabright LED illumination at the tip to deliver a crisp 2.4" (320 x 240 pixel) color image on a lightweight rechargeable LCD monitor. The stylet is waterproof and can be cleaned by scrub/wash/wipe, high-level disinfection in 2% Glutaraldehyde, or sterilized in Sterrad gas plasma hydrogen peroxide. The monitor is not waterproof, and should be cleaned/disinfected by wipe down only. The AincA Video Stylet is generally sold as a "Kit" containing one reusable/malleable stylet, a rechargeable LCD monitor, a USB/110v charger, and a user manual/ information guide.

- Low density polyethylene provides proper stiffness of ease of insertion
- Pediatric and adult with coude tip are calibrated to ensure accurate distance insertion
- Pediatric size fits in 4mm to 6mm tubes
- Adult size fits in 6mm to 11mm tubes
- Pediatric size can be used as a straight or coude tip
- Latex free, single use, sterile

STYLET - PVC COATED - DISPOSABLE

These are the most adaptable, cost effective stylets available on the market. Each stylet contains malleable wire encased in a specially designed PVC sheath which allows the stylet to be used in a wide range of endotracheal tube sizes while still maintaining the shape required. With just 2 stylet sizes in inventory, all ET sizes are covered, simplifying inventory control and ordering. Sold 25 per box.

DUAL HEAD STETHOSCOPE

| DESCRIPTION | ORDER NO. | REGULAR PRICE |
|--|-----------|---------------|
| <input type="checkbox"/> Black Tubing with silver chestpiece | H-1387 | \$16.00 ea |
| <input type="checkbox"/> Blue Tubing with silver chestpiece | H-1390 | \$16.00 ea |

■ Available in choice of 5 colors

These lightweight modern stethoscopes feature adjustable binaurals for comfort, one-piece molded PVC tubing for good sound transmission, and a rubber non-chill ring on the bell side of the chestpiece. Color coded makes this an ideal stethoscope to leave in controlled isolation areas, or to identify hospital department to which the scope was issued. Approximate length from binaurals to end of tubing is 30".

LITTMANN LIGHTWEIGHT II S.E. STETHOSCOPE

The Trusted Standard: A stethoscope built for students and initial triage.

- Dual headed chestpiece diaphragm is tunable, allowing for auscultation of high or low frequencies without flipping over.
- A high quality alternative to common sprague and nurse stethoscopes.

| <input type="checkbox"/> Temperature Monitor, Strip (88°F to 106°F) and (31°C to 41°C) – 100/bx | H-9395 | \$180.00/bx |

- Liquid Crystal Temperature Monitor
- Strip Design provides for larger display and a wider range.
- Fahrenheit and Celsius scale on one monitor.
- Displays patient's current temperature in large, bright, green numbers.
- Widest Range of readings: 88°F to 106°F and 31°C to 41°C.
- Non-allergenic backing.
- Can be worn for extended lengths of time to minimize risk of hospital acquired infection.

(Minimum order – 1 box of 100 each)

STYLET - PVC COATED - DISPOSABLE

The liquid crystal temperature strip monitor is designed to provide instantaneous temperature readings. With the Kwik-Skan oval temperature strip you will be immediately aware of your patient's temperature even as it fluctuates. The Oval design permits better contact with blood flow pattern (92°F to 106°F) and 34°C to 41°C). Temperature strips are sold in quantities of 100 per box.
